We are experts in dealing with the following pests

Cockroach Control

This service aims to control different cockroach species, for example German cockroaches associated with kitchen area and small in size, American cockroaches associated with sewers and drainage system, Oriental cockroaches associated with damp and cool areas among others. Evershine ranked as the best pest control company for cockroach treatment.

Ant Control

Pesky pests, small insects associated with kitchen area, attack pet food, baby food containers, invade carbohydrate foods and nuisance. These insects include fire ants, pharaoh ants, pavement ants, brown ants, wood ants and other species. Call us today for the best quote.

Rodent Control

Are you facing losses, allergy and foul - pungent smell due to rodent activities? Look no further, as professional pest control based in Abu Dhabi & Dubai we provide pocket and environmentally friendly solutions to the problems associated with rats, mice and other rodentia animals.

Fly Control

Flies are seasonal flying insects and are of different species, they carry germs, viruses, protozoa on their legs and claws. For example, House and blue flies associated with garbage dumping sites, unhygienic markets and restaurants; Fruit and damp flies associated with drain sinks and rotting garbage inside enclosures. Get hassle free quotation for fly control from Evershine LLC.

Bees and Wasp control

Bees, wasps and hornets are regarded as beneficial insects however, they are dangerous in some cases especially when frightened or disturbed. Their sting is very painful and venomous; it can cause loss of life in some cases. For the quote and removal of bee hives, wasps and hornets call Evershine LLC.

Silver Fish and Earwigs Control

These pesky insects develop in areas that are damp due to humidity or near water source. Evershine will provide affordable and effective method to get rid of those nuisance pests.

Mosquito Control

Blood sucking insects are common in UAE nowadays, especially in the evening hours after sunset and morning hours before sunrise. They transmit diseases like malaria, Zika, dengue fever, elephantiasis, sleeping sickness and Chikungunya

Weevil and Beetle Control

These insects invade mainly wooden furniture, cereals and grains. They are referred to as stored or grain pests. To check for their activity, we advise everyone to check their kitchen cabinets, wardrobes, sofas regularly. Evershine provide total solution to the problems associated with weevils and beetles.

Lizard and Snake control

These are both reptiles associated with bushy and old abandoned buildings or structures. In the case of snakes, they can live both on land (soil/sand) and water (sea, river, lake). Lizards and snakes cause allergy and their bites are venomous. Evershine LLC has gotten experts trained on how to trap, bait, and get rid of these reptiles.

Wood Worms

These develop in wooden furniture like beds, sofas in circumstances where moisture or humidity accumulate in the house or store areas. Evershine experts provide total solution to such problems.

Bedbug Control

These are non-flying blood suckers associated with bedding material. These insects are very common with congested accommodations and they can be moved from one area to another via contaminated clothes, furniture and equipment. Call us today for pest survey and inspection, we're the experts in treating bedbugs.

Moths and Butterflies Control

These are agricultural pests associated with cartons and baskets made from dry tree stalks. For complete elimination of such insects, contact Evershine Gen. Maintenance and Cleaning LLC.

Flea and Mites Control

Are you feeling itchy bites and small wandering insects around your face, ears while sleeping at night? These might be flea or mites, please call Evershine experts for the solution. With our experts, your peaceful sleep shall be regained.

Pigeons and Feral Bird control

Millions of Dirhams is lost due to maintenance as a result of pigeon activities. Places like Aircraft Hangars, Buildings with attractive architectural designs, balconies and warehouse create resting grounds for the birds thus leading to accumulation of waste, soiling and uric acid. Stop all this mess and cut the maintenance costs by using integrated management techniques for Bird Control.

Booklice control

Tiny and whitish-wingless insects wandering on the bathroom walls, kitchen cabinets or bedroom walls? Trouble, these are booklice resulting from damp or moist insulation material or high humidity inside an enclosure for a pro-longed period. Not every technician or pest control company will solve this problem because such insects are rare and thus companies lack control knowledge. Evershine LLC ahead other companies with updated information and knowledge to handle such invasive species.

Scorpion Control

Scorpions are associated with factory premises and isolated building or structures nearby farms or water bodies. These are venomous but they can be prevented or controlled from causing harm to people, pets and livestock. Safeguard your premises by calling Evershine LLC for the best solution.

Tick

These are associated with pets and farms animals as their primary. They attack human as the secondary host. They can transmit fever related diseases. For treatment call Evershine LLC.

Spider

Are you moving into a newly completed or renovated building/villa? Remember spiders like quiet and cool areas especially corners and ceiling areas of the house. Their bites are venous. As Evershine LLC, we recommend spider treatment before moving-in.

Maggot and Larvae

Decomposing organic matter like garbage, fecal matter left inside can lead to development of maggots making the complete house unusable. To solve the problem, pest control and cleaning must be combined. Evershine LLC is here to offer total solution to your cleaning and pest control worries.

Pill Bug, Millipede & Centipede

These are mainly agricultural pests are associated with organic manure or fertilizer as their habitat. They are scarcely, allergic and very venous especially to crawling babies.
